**NO CHANCE FOR CORONA**

How Kids can Help Beat the Virus

- **The disease caused by the coronavirus is called COVID-19.**
- **The coronavirus doesn’t respect borders!**

**Cities are more affected because they are crowded.**
Precaution is the key! Corona enters the body through mouth, eyes or nose.

**This is why Corona spreads easier than the flu.**

**But a person can have COVID-19 without showing any symptoms.**

Older people and those with existing health conditions can get seriously ill. Sometimes they need to be hospitalized.

**We must all practice social distancing.**
It’s a very effective way to avoid spreading the virus.

**Keep a distance of 1.5 meters to other people.**

**Wash your hands with soap when you come back home from outside.**

**Wash your hands if you come in contact with other people.**

**Sneeze and cough into your elbow.**

**Remember to protect yourself and everyone around you!**

**Guys, together we can slow down the spread of the virus!**

Africa, Asia, America, Europe, big cities, small cities, villages, anywhere!

**When corona enters your body it multiplies, and can cause high temperature and cough.**

**No team sports. No movies. No eating at a restaurant...**

**The poster is based on a comic and a video called “No chance for Corona” jointly created by Welthungerhilfe and WASH United. Both can be downloaded at https://www.welthungerhilfe.org/coronavirus-comic/**
